

Edie in Marble ED.08.01

Edie is the organic cousin to Empire, where slices of beveled marble explode beyond the confines of a machined brass frame. The resulting visual is at once kinetic and serene, like a perched bird about to take flight.

The Edie Marble ED.08.01 is constructed with hand-cut and beveled marble with brass hardware. Available with White Marble, Black Marble, White Glass on the exterior and oil rubbed brass, stain nickel, brushed brass or vintage brass hardware. Custom marble colors by request, please inquire. Designed by Mary Wallis for Lindsey Adelman Studio.
