

Jewel Sconce

Scott Daniel Design

This sconce design was developed in collaboration with a client. The goal was to have an array of four sconces where each would look different. The solution came in the form of a unique design of the mounting hardware, which allows the designer and their installation team to select which orientation to begin with, and then easily rotate the sconce up to 45° clockwise or counterclockwise.

Starting at:

12"W x 18"H x 7"D
