

Luna A X-Small Pendant

Gabriel Scott

“Luna A” is the first release in the new Gabriel Scott product class, named the “A-Series”. The Luna A X-Small Pendant is one of eight fixtures in the collection designed to satisfy the demand for a more affordable range of architectural lighting products which can be specified more easily throughout residential projects, restaurants and hotels.

Available in satin brass, bronze or black steel, the Luna A Small Pendant stands out by its simplicity and elegance. The pendant combines colored glass with metal hardware and works on its own or in a cluster with other pendants from the Luna A Series.
