

Luna Sconce

Gabriel Scott

Luxurious in its simplicity, the Luna Sconce is a stunning alternative to the 'with beads' option when you're looking for a more pared back design.

Mounted on a backplate available in a number of metal finishes, the handblown alabaster white tube diffuses an elegant soft light, making it a perfect choice for an entranceway, or as additional lighting in a living or bedroom space.

The Luna Sconce is available in blackened steel, satin brass, nickel, copper or bronze finishes, and is often purchased in pairs or in sets of three to create an elegant look for someone's private home. They work equally well on a larger scale for hospitality projects.
