

Milk Day Bed by Anna Karlin

Made from maple and stained a rich black this day bed is upholstered in our Japanese textile collection. The cotton / linen blend fabrics are hand made in Kyoto by master weavers Hosoo, a Japanese family owned company originated in 1866. The intricate detail on the joinery the 'milk bottle' shape gives rise to the name of the piece. We offer the day bed in our textiles but if you have a fabric you would like to use – please let us know and we can accommodate your request.
