

spun champagne bucket brass

Space age, Art Deco or Pop – everybody sees a different influence in these three pieces of ultra-expressive, occasional, furniture. Generously proportioned, curves of spun-sheet solid brass are hand polished to a mirror finish bringing instant disco glamour to the cocktail bar, dining hall or living room. Formed of two parts, the ice bucket stands tall ready for service. The removable bucket, which slips neatly into its free-standing frame, allows for ease of use on both the table top and as a stand-alone feature.
