

## Welles Arm Sconce by Alessandro Munge

Gabriel Scott

The Welles Arm Sconce by Alessandro Munge brings a simplistic approach to the design, highlighting the structured bracket and jewel-like module, suitable for both wall and ceiling installation.

The original Welles was deconstructed and rebuilt using a new support system and includes a beautiful jewel-like connecting bracket, thus creating a significant visual divergence and a reenergized dialogue between the interconnected elements.

Starting at: \$3,750

9.89" x 8" x 29.67" from the wall
