

Welles Central Chandelier 18 by Alessandro Munge

Gabriel Scott

The Welles Central Chandelier 18 maintains an impressive scale, whilst the increased number of modules enhances the focus on the jewel-like glass modules. Munge's capsule collection comprises a Central Chandelier in three different sizes, alongside an Arm Sconce.

Alessandro Munge has developed a beautiful narrative infused with dynamic and bold fashion references inspired by rhythmic dance for his Welles capsule collection.

The original Welles was deconstructed and rebuilt using a new support system and includes a beautiful jewel-like connecting bracket, thus creating a significant visual divergence and a reenergised dialogue
